Bien que l'Administration du Bureau Veritas fasse son possible pour obtenir des informations correctes sur les navires contenus dans le REPERTOIRE GENÉRAL, il est bien entendu qu'elle ne peut garantir la complète exactitude de tous les renseignements concernant les navires qui ne sont pas classés dans son REGISTRE.

While the Administration of the Bureau Veritas take all possible care to obtain correct information concerning the vessels entered in the « REPERTOIRE GENERAL », it must be understood that they do not guarantee the accuracy of the particulars given concerning vessels which are not classed in the VERITAS REGISTER.

BARRY DOCKS,

BARRY, GLAMORGANSHIRE.

(Dock No. 1, was opened on July 18th, 1889, and Dock No. 2 on October 10th, 1898.)
(Le Bassin N° 1 a été ouvert le 18 Juillet 1889 et le Bassin N° 2 le 10 Octobre 1898.)

Owners	THE BARRY RAILWAY COMPANY.
Chairman	The Right Hon. The EARL OF PLYMOUTH.
General Manager . . .	EDWARD LAKE.

Area. The Barry Docks are 114 acres in extent, and have accommodation for the largest vessels afloat.

The Sea Approach is remarkably easy owing to the absence of any rocks or shoals in this part of the Channel, and to the efficient way in which the Channel is lighted. Within 700 yards of the entrance to the Docks there is a depth of 26 feet at low water Spring Tides.

The Deep Water Lock was opened for traffic in January, 1898, and vessels drawing 13 feet can enter or leave at low water Spring Tides, and during 15 days of each month vessels drawing 18 feet can enter or leave at low water. No other Dock in the Bristol Channel possesses a Deep-sea Entrance.

Pilotage. There is a separate Pilotage Board for **Barry**, and Barry being nearer the sea, the Pilotage Charges are **Lower** than for neighbouring Ports. Pilotage inwards or outwards is not compulsory.

Ship Repairing, etc. There is a public Graving Dock of large capacity (length 863 feet, width at top 113 feet 6 inches, width at bottom 100 feet, width at entrance 60 feet) and capable of division into outer and inner Docks of different lengths, at which shipowners can employ their own Marine Engineers.

There are also two large Private Graving Docks, one capable of accommodating the largest class of vessels. Several Marine Engineering Firms are established on the Dock property.

Quayage. The Quayage is ample, and extends for a length of over 7,700 feet, irrespective of the space covered by the Coaling Appliances.

Warehousing. There is ample accommodation for storing Goods.

Machinery and Appliances. All is of the most improved type. There are **31 Fixed** and **7 Movable** Coal Tips. By means of the Movable Tips a vessel can load at three hatchways simultaneously. Each Coal Tip has two Weighbridges; wagons can therefore be weighed when full and when empty. The re-taring is done free of charge.

Lighting. The Docks are lighted Electrically throughout.

Dock Charges. These are much below the average of other great Ports.

Railway Accommodation. There is a complete system of Railway Lines around the Docks, and goods can be shipped direct from, or loaded direct into, Railway Trucks.

The Company's Railway is connected with all the railways in the country, and the rates quoted for the Carriage of Merchandise to and from Ship at Cardiff are also applicable to and from Ship at Barry.

The Company's Passenger Trains run through to Cardiff at frequent intervals.

The Shipping Tonnage frequenting the Docks annually is about 4,500,000 Tons N.R.T.

The Customs and Board of Trade Offices, Post Office, and several Banks are adjacent to the Docks.

For further information please apply to the GENERAL MANAGER, Barry Dock.

Superficie. Les Bassins de Barry ont une superficie d'environ 46 hectares et peuvent recevoir les plus grands navires du monde.

L'Accès du large est remarquablement facile à cause de l'absence de toute roches ou bancs dans cette partie du Canal de Bristol et de la manière efficace dont le Canal est éclairé. A 700 mètres de l'entrée des bassins, il a une profondeur de 26 mètres à marée basse de vive eau.

L'Ecluse en eau profonde fut ouverte au trafic en janvier 1898 et les navires calant 13 pieds peuvent entrer et sortir à marée basse de vive eau; pendant 15 jours par mois, les navires calant 18 pieds peuvent entrer et sortir à marée basse. Aucun autre Bassin dans le Canal de Bristol ne possède une entrée en mer profonde.

Pilotage. Il y a un Comité de pilotage spécial pour Barry et Barry étant plus près de la mer, les droits de pilotage sont **moindres** que pour les ports environnants. Le pilotage à l'entrée ou à la sortie n'est pas obligatoire.

Réparations de Navires, etc. Il y a une cale sèche de grandes dimensions (longueur 263 m., largeur en haut 34m60, largeur au fond 30m50, largeur à l'entree 18m38) capable d'être subdivisée en cales de différentes longueurs et où les armateurs peuvent employer leurs propres ingénieurs.

Il existe également deux autres grands bassins sec dont l'un permet d'admettre les plus grands navires.

Plusieurs firmes d'Ingénieurs de marine sont établies sur la propriété des Docks.

Quais. Les quais sont larges et s'étendent sur une longueur de 2,400 mètres, sans compter l'espace occupé par les appareils à charger le charbon.

Magasins. Il y a de grands emplacements pour emmagasiner les marchandises.

Les Machines et Appareils sont de types les plus perfectionnés. Il y a 31 décharges à charbon fixes et 7 mobiles. Au moyen des décharges mobiles un navire peut charger par trois écoutilles à la fois. Chaque décharge à deux bascules, les wagons peuvent donc être pesés pleins et à vide, le tarage est fait sans frais.

Eclairage. Les bassins sont éclairés à l'électricité partout.

Droits de Quais. Ceux-ci sont bien en dessous de la moyenne d'autres grands ports.

Facilités des voies ferrées: Il existe autour des Bassins un système complet de voies ferrées et les marchandises peuvent être déchargées directement des ou chargées directement sur les wagons du chemin de fer.

Les chemins de fer de la Compagnie sont reliés directement à toutes les autres lignes du Pays, et les tarifs appliqués pour le transport des marchandises du navire à Cardiff et vice-versa sont également applicables à Barry.

Les trains à passagers de la Compagnie se rendent à Cardiff à des intervalles fréquents.

La capacité de tonnage maritime fréquentant le port s'élève annuellement à environ 4,500,000 tons nets.

Les Bureaux de la Douane, du Board of Trade, la Poste et plusieurs Banques sont contigus aux Bassins.

Pour toutes autres informations s'adresser au DIRECTEUR GÉNÉRAL, Barry Dock.

TYNE IMPROVEMENT COMMISSION.

ALBERT EDWARD DOCK, NORTHUMBERLAND DOCK, RIVER COAL STAITHS, &c.

The **ALBERT EDWARD DOCK**, adapted for large Vessels and possessing excellent facilities for dealing with IMPORT and EXPORT Traffic is nearer the Harbour Entrance than any other Dock on the Tyne.

A **WAREHOUSE, 200** feet long by **100** feet broad, built for the storage of **Grain** and **General Merchandise,** on the South Quay of the Dock, contains six floors, each fitted with hydraulic machinery, and necessary appliances; and spacious cellars suitable for the storage of provisions, Tallow, and other goods.

The Dock Quays are well equipped with **STEAM AND HYDRAULIC CRANES** for unloading and loading vessels direct to and from Truck or Warehouse.

The Dock contains a large **COAL SHIPPING STAITH** at which Vessels can bunker and/or load Coal, after discharging their inward cargoes.

The **NORWEGIAN ROYAL MAIL** and **PASSENGER STEAMERS** sail from this Dock on alternate week days. Special trains convey passengers from the Central Station of the North Eastern Railway Company at Newcastle-upon-Tyne to the Passenger Steamer Wharf at the Dock.

Water Area of Dock, about 22 1/4 acres; Tidal Basin, about 2 3/4 acres; Tidal Entrance, about 80 feet wide at top, and about 74 feet 6 inches at bottom (the side walls being battered); Lock, about 350 feet long and about 60 feet wide at top, and about 53 feet at bottom (the side walls being battered); the Depth of Water on the centre of the sills of the Tidal Entrance is about 30 feet at High Water Ordinary Spring Tides, and about 25 feet at High Water Neap Tides, but owing to the bottom of the entrance being curved, the depth is about 3 feet 6 inches less at the foot of the side walls. The depth on the centre of the Lock and on its Outer sill is about 21 feet at Low Water Ordinary Spring Tides, and about 3 feet less at the foot of the side walls. The depth of the Inner Sill of the Lock is 6 feet less, being the same as that on the Tidal Entrance Sills. Vessels about 300 feet long, and drawing about 20 feet can be locked in at Low Water.
Length of Quays inside Dock about 3,000 feet; of River Wall or Quay, about 900 feet.

The **NORTHUMBERLAND DOCK,** containing **11 Coal Shipping Staiths,** is situated about **1,200** yards south-west of the Albert Edward Dock Entrance, is used for general **Import** and **Export** Traffic, and is well provided with **Steam Cranes,** and also with spacious **Warehouses** for the Storage of Merchandise.

Water Area of Dock, about 50 acres. Tidal Basin, about 2 1/4 acres. Tidal Entrance, about 70 feet wide at top and about 64 feet wide at bottom (the side walls being curved). Lock, about 250 feet long, and about 52 feet wide at top, and about 47 feet wide at bottom (the side walls being curved); the Depth of Water on the centre of the Sills of the Tidal and Lock Entrances is about 24 feet at High Water Ordinary Spring Tides, and about 19 feet at High Water Neap Tides, but owing to the bottoms of the Entrances being curved, the depths are respectively about 2 feet and 5 feet less at the foot of the side walls.

At the Commissioners' **RIVER COAL STAITHS** (between Albert Edward and Northumberland Docks) large Vessels requiring to load Coal and Coke without entering the Docks, can take in full cargoes and proceed direct to sea.

Certain of these **STAITHS,** are fitted with **HYDRAULIC LIFTS** for loading **and bunkering Steamers of exceptional height.**

An additional River Staith, provided with a Hydraulic Lift, for the shipment of Coal and Coke, is at present under construction by the Commissioners.

The above Docks and Staiths have direct railway communication with all parts of the Kingdom.

They are within twenty minutes walk from Percy Main and North Shields Stations, on the Tynemouth Branch of the North Eastern Railway. The Tyne General Ferry Company's steamers, running between Newcastle and Tynemouth, call every half hour at the Northumberland Dock Landing, close to the Dock Offices, and the Commissioners' Steam Ferry plies every quarter-of-an-hour between Whitehill Point, situated between the two Docks, and South Shields.

The Shipments of Coal and Coke at these Docks and Staiths amounted to **over 3½ million tons in 1905.**

Adjoining both Docks there is a **considerable area of land** available for the storage of **Timber, Props, Deals, Battens and Boards, Telegraph Poles, &c.,** and for the establishment of **Timber Yards, Saw Mills, Creosoting, and other Industrial Works, &c.,** in connection with the Shipping and Trade of the Port.

Applications from Merchants, Capitalists, Manufacturers, and others, to rent portions of this land, addressed to the undersigned, will receive the favourable consideration of the Commissioners.

The Commissioners' **TIMBER PONDS** at **Jarrow Slake,** opposite Northumberland Dock, which contain an area of about **76** acres, and have direct access from the river, are let on short tenancies. Timber may also be stored in the ponds at a weekly rental.

The **TYNE,** as one of the **Principal Coal Ports** in the Kingdom, affords superior advantages to vessels requiring Outward Freights.

Steamers "calling" in the Tyne to "**Bunker**" at the Commissioners' Docks and Staiths, can purchase the best **Steam Coal** on the most favourable terms, and obtain the benefit of modified Dues.

The exports of Coal and Coke from the Port, amounted to nearly **16 ½ million tons** in 1905.

Ballast is quickly discharged from and or loaded into vessels by the Commissioners' S.S. Ballast Hopper Barges.

Excellent facilities exist in the Port for discharging and loading vessels, and for warehousing all descriptions of General Merchandise, Grain, &c., and for Storing Wood Goods "under cover" and in the "open."

Liberal reductions in dues are made on vessels discharging and/or loading partial cargoes in the port.

Full information as to Rates and Charges may be obtained on application to the Commissioners' Traffic Manager, Northumberland Dock, Percy Main, or to

J. Mc. DONALD MANSON,
SECRETARY.

Tyne Improvement Commission Offices,
Newcastle-upon-Tyne,

NEW EDITION (increased sevenfold)

"SCOTT'S CODE"

THE SHIP-OWNERS' TELEGRAPHIC CODE,

ORIGINAL COMPILED BY THE LATE E. B. SCOTT.

TENTH (1906) *EDITION ENLARGED AND RE-ARRANGED*

BY

E. L. BENTLEY.

1. — DIMENSIONS :— 12⅝ in. × 11½ in. × 2 in.
2. — **Contains about 120,000 sentences and 121,000,000 combinations.**
(The 17,000 sentences in the former Editions have almost all been retained, but are properly classified.)
3. — The subjects, *and sentences under the subjects*, are now arranged alphabetically; the sentences can therefore be instantly found. A few of doubtful classification have been put in two places to ensure this.
4. — Enables any two of thousands of sentences, ports, rates, quantities and dates to be coupled in one word, or with the names of steamers. An abridged edition of Bentley's Phrase Code is included for this purpose.
5. — Tens of thousands of general sentences and Merchants' phrases have been inserted and its scope widened.
6. — Is intended for Passenger and Mail S.S. Companies as well as for cargo steamers, sailing vessels, Brokers and Shippers.
7. — Has a great many tables.
8. — Has been brought up to date including Frozen Meat and Refrigerated Cargo.
9. — Chartering has been made a special feature.
10. — All Code words appearing in the 9th Edition have been eliminated from the 10th (New Edition) to prevent any possible confusion between the Editions. SCOTT'S CODE Words now begin with consonants, and BENTLEY'S PHRASE CODE with vowels— a great facility.
11. — Four blank lines (with Code words) have been left at foot of each page for users own private additions.
12. — A large number of copies of the New Edition have already been ordered prior to issue, thus ensuring its general and rapid adoption.
13. — About 100,000 sentences have been sent in by users of SCOTT'S CODE with permission to insert them in the New Edition, thus making it of an exceptionally practical character. This has delayed the issue.
14. — Price with 120,000 sentences and 121,000,000 combinations, only £2 12s. 6d., the cost of which is rapidly saved by the exceptional facilities which the Code affords.

THERE IS NO CODE IN EXISTENCE AFFORDING SUCH COMPLETE FACILITIES.

Its cost is saved in a few messages.

PRICE : £2. 12s. 6d. — Postage Extra : Inland 1/-, Foreign 3/6.

The NEW EDITION contains 120,000 Phrases carefully selected by Experts from a total manuscript of 240,000 Sentences compiled during the past 20 years.

As so many Firms Abroad have expressed a wish to see the greatly Enlarged Edition of SCOTT'S CODE, the Proprietor agrees to forward the book on approbation upon receipt of remittance, and should it not be found suitable, the money will be returned (less Postage) if the book is sent back within the fortnight following its delivery.

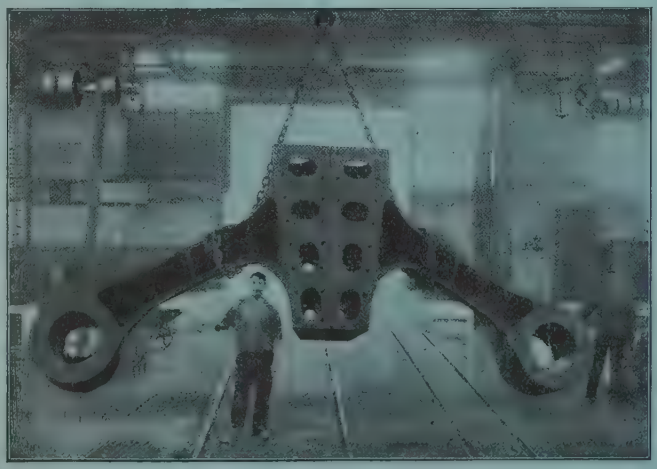
SOCIÉTÉ DES ACIÉRIES KRIEGER, DÜSSELDORF (Allemagne)

BUREAU A PARIS: **J. BONY, Ingénieur,** 14, rue de Turin

Téléphone 319-33.



Production unique :

ACIER COULÉ

Pièces brutes de fonte et finies, de toutes dimensions, jusqu'aux plus grandes, pour la construction des machines, des navires, des ponts et pour les usines d'électricité.

Roues d'engrenage de tous profils et de toutes grandeurs, moulées à la machine.

Pièces et chaînes entières pour dragues.

Société Anonyme des Usines Skoda
PILSEN-BOHÊME

Direction Générale et Direction Commerciale à VIENNE, 1, FRANZ JOSEFS-QUAI, 1.

Aciéries, ateliers d'ajustage et de moulage.

Les usines Skoda produisent des moulages d'acier des formes les plus compliquées et de toutes dimensions pesant jusqu'à 50.000 k^{os}, elles garantissent ces moulages sans soufflures. Quant à l'acier employé, la résistance varie de 42 à 70 k^{os} par mm^2, et l'allongement est de 28 % à 15 %, suivant la qualité.

Fabrication de toutes sortes de moulages d'acier
pour chemins de fer; pour les fabricants de machines, construction de navires, ponts et outillage de minoterie, outillage de mines, laminoirs et grosses forges.

Fabrication de pièces de forge.

SPÉCIALITÉS :

Cœurs et croisements pour changements de voie.

Centrées de roues en acier moulé pour locomotives.

Pignons de laminoir et engrenages à dents en flèches
de toutes dimensions, moulés d'après modèle ou mécaniquement; marche silencieuse et grande sûreté contre la rupture.

Pièces pour construction de navires
étambots, gouvernails, etc., en acier moulé, remplaçant le métal forgé ou soudé.

Hélices pour navires de toutes formes et dimensions.

Corps de piston pour machines à vapeur, manivelles, disques-manivelles, arbres coudés, cylindres hydrauliques garantis à 600 atmosphères de pression, cuves pour le zingage et l'étamage des métaux.

Fabrication de toutes les pièces pour construction de machines électro-dynamo :
roues magnétiques, châssis, pôles, qualité de l'acier à toute épreuve, de même ses qualités magnétiques.

COMPAGNIE DU GAZ CLAYTON
Procédés et Appareils de Désinfection et d'Extinction.
20, RUE TAITBOUT, PARIS.
GRAND PRIX Exposition Nationale d'Agriculture Coloniale, Paris 1905.

TÉLÉPHONE 322-73. 322-74.

Réduction des quarantaines. | **DÉSINFECTIONS.** | Économie de temps et d'argent. | Garanties pour le frêt. | **INCENDIES.** | Réduction de primes d'assurances.

Opération sur le " LAOS " en rade d'Haïphong.

Au 1er août 1906, 150 navires dont 125 vapeurs, représentant un tonnage de plus de 750,000 tx., étaient munis de l'appareil CLAYTON.

PRIX DES APPAREILS :
D. 4,000 — A. 11,000 — B. 25,000.
Sans accessoires.

Le Gaz Clayton prévient les incendies :

Dans une cale remplie de ce gaz, les marchandises les plus inflammables, telles que les **Charbons**, les **Cotons**, les **Jutes**, les **Pétroles**, les **Alcools ne peuvent pas prendre feu,** par suite d'une imprudence, ni même d'une manœuvre criminelle. **Ce gaz** empêche tout échauffement et, par conséquent, tout incendie spontané, même dans les charbons les plus dangereux à transporter.

Le Gaz Clayton éteint les incendies les plus violents. Contrairement aux autres moyens en usage, il ne détériore rien. Seules les marchandises atteintes par le feu sont endommagées.

Nombre des plus importants **ASSUREURS MARITIMES** *accordent aux navires munis de l'***APPAREIL CLAYTON** *des* **réductions de primes** *dont l'importance dépend de la nature plus ou moins inflammable des marchandises.*

La surveillance des installations du tuyautage à bord des navires en France est exercée exclusivement par le BUREAU VERITAS.

Le Bureau **VERITAS** donne la marque spéciale **CLAYTON** dans le Registre et le Répertoire général à tout navire muni de l'appareil **CLAYTON.**

APPAREILS MOTEURS POUR NAVIRES DE COMMERCE

MM. **Schneider & C^ie** ont construit les appareils moteurs des cargos-boats, *Charles-Le-Cour*, *Belle-Ile*, *Longwy* et *Trignac* de chacun 4,520 tonneaux.

Chacune des machines motrices de ces appareils est du type vertical pilon, à 3 cylindres et à triple expansion ; à la vitesse de 80 tours par minute, ellés devaient réaliser chacune une puissance de 1,200 chevaux.

Malgré les conditions très défavorables de vent et de mer dans lesquelles eurent lieu les essais des bateaux, ces machines ont donné des résultats de consommation sensiblement plus économiques que ceux qui avaient été garantis. A l'essai de puissance, chaque machine a réalisé, avec la plus grande facilité, pendant 4 heures, une puissance de 1,340 chevaux. La vitesse obtenue fut de 11 n. 9.

Ces résultats ont donné toute satisfaction aux constructeurs de la coque et aux armateurs.

DAVIS'S PATENT STEERING GEARS

DAVIS'S PATENT STEAM AND HAND COMBINED STEERING APPARATUS.

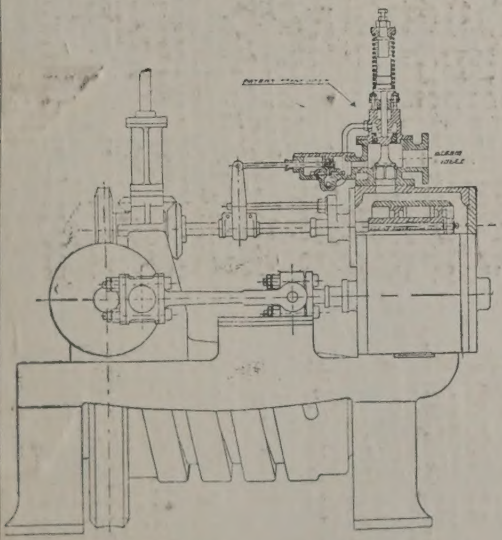
As supplied to English Admiralty, Warships, Cruisers, Gunboats, Torpedo Catchers & Torpedo boats. About 3,000 supplied to Merchant ships of 50-15,000 tons displacement. Also Russian, Japanese, Chinese, Dutch, Belgian, Italian, Argentine and other Governments.

APPAREILS A GOUVERNER BREVETÉS DE DAVIS

APPAREILS A GOUVERNER BREVETÉS, A VAPEUR ET A MAIN.

Fournis à l'Amirauté Anglaise et installés à bord des Cuirassés, Croiseurs, Canonnières, Contre-torpilleurs, Torpilleurs. Environ 3,000 spécimens ont été placés à bord de Navires de commerce de 50 à 15,000 tonneaux de déplacement. Fournisseurs également des Gouvernements Russe, Japonais, Chinois, Hollandais, Belge, Italien, Argentine et autres.

3,000 STEERING ENGINES FITTED.



The DAVIS Patent Economiser.

Fulfils two Functions:

1st. — IT REGULATES THE STEAM SUPPLY proportionately to the load on the Steering Engine, which increases as the Rudder is moved from its central position.

2nd. — IT SHUTS OFF ABSOLUTELY THE STEAM SUPPLY as and when the Engine comes to rest, thus obviating the hitherto unavoidable and well known leakage past the Controlling Valve.

FULL PARTICULARS ON APPLICATION
